

Personal Income by State and Region, Second Quarter 1995

This article was written by Duke D. Tran. The quarterly estimates of State personal income were prepared by the Regional Economic Measurement Division.

PERSONAL INCOME in the Nation increased 0.8 percent in the second quarter of 1995 after increasing 1.8 percent in the first.¹ The 0.8-percent increase, the smallest increase since the third quarter of 1993, equaled the 0.8-percent increase in U.S. prices (as measured by the fixed-weighted price index for personal consumption expenditures). By State, the increase in personal income equaled or exceeded the increase in U.S. prices in 24 States.

The remainder of this article looks at the States with the fastest and the slowest growth in per-

sonal income in the second quarter. Tables 1 and 2 at the end of the article contain the quarterly estimates of total and nonfarm State personal income, beginning with the first quarter of 1992. These estimates incorporate the revisions to the annual State estimates published in the August 1995 SURVEY OF CURRENT BUSINESS.

Fastest growing States

In seven States, increases in personal income were at least 0.5 percentage point more than the U.S. average (table A and chart 1). In all seven

1. In this article, percent changes are at quarterly—not at annual—rates.

CHART 1

Total Personal Income: Percent Change, 1995:I – 1995:II

States, increases in payrolls were above average in wholesale trade and in services.²

In Nevada, Utah, Oregon, and Washington, payroll increases were also above average in nondurable goods manufacturing and in the transportation and public utilities group. In most of these States, payroll increases were above average in durable goods manufacturing, in construction, in retail trade, in the finance, insurance, and real estate group, and in government. In addition, in Oregon, farm income was strong, and in Nevada, mining payrolls increased at an above-average rate.

In Vermont and Maine, payroll increases were above average in durable goods manufacturing; in addition, in Maine, farm income was strong, and payroll increases were above average in construction, in mining, and in the transportation and public utilities group. In Vermont and Florida, payroll increases were above average in nondurable goods manufacturing and in the finance, insurance, and real estate group; in addition, in Florida, payroll increases were above average in retail trade and in government.

Slowest growing States

In six States—Arkansas, North Carolina, Ohio, Idaho, Alabama, and Mississippi—increases in

personal income were at least 0.5 percentage point below the U.S. average increase of 0.8 percent. In six other States—Michigan, Indiana, Delaware, Nebraska, South Dakota, and Iowa—personal income declined. In all 12 States, farm income and payrolls in durable goods manufacturing declined.

In Arkansas, Nebraska, South Dakota, and Iowa, the declines in farm income substantially dampened personal income growth. In Arkansas, Nebraska, and Iowa, the declines were mainly in Federal farm subsidy payments, and in South Dakota, the decline was mainly in farm income excluding subsidies. In most of these four States, payrolls declined in nondurable goods manufacturing, in construction, and in mining; payrolls either declined or increased at below-average rates in government. In addition, payrolls declined in both wholesale and retail trade in South Dakota, and payroll increases were below average in wholesale trade in Arkansas, in retail trade in Nebraska, and in services in South Dakota.

In Ohio, Michigan, Indiana, and Delaware, the payroll declines in durable goods manufacturing followed large increases in the first quarter. The downturn was mainly in the motor vehicles industry; production declined more in the second quarter than in the first, and bonus payments were made in the first quarter but not in the second. Payrolls also declined in nondurable goods manufacturing and in mining. In

2. In this article, an increase in an industry's payrolls in a State is "above average" ("below average") if it is more than (less than) the 0.8-percent increase in the Nation's personal income.

Table A.—Percent Change in Selected Components of Personal Income for Selected States and the United States, 1995:I-1995:II
